DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 25, 2003 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 7-9, 18-22, 24-29, and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Arraudeau et al. (US 5154916) ("Arraudeau") in view of Jeffcoat et al. (US 5871756) ("Jeffcoat"), Mizuno et al. (US 4350679) ("Mizuno"), and Leis, Jr. et al. (US 5149541) ("Leis").

Arraudeau teaches a wax-based mascara comprising 10 percent by weight of carnauba wax and keratin hydrollysate and gum, which are water-soluble polymers. See Example 4 in Arraudeau; instant claims 1-4, 7-9, and 18-22. In Example 4 in the Arraudeau, carnauba wax and beeswax are used in the ratio of 3.3:1. See instant

Art Unit: 1617

claims 25-28. The reference fails to teach that the composition is a wax-in-water emulsion. The reference also fails to teach the particle size of the wax.

Jeffcoat teaches that triethanolamine stearate is a well-known oil-in-water emulsion. See col. 12, lines 30-36.

Mizuno teaches that carnauba wax powder having particle size of less than 80 mesh is conventionally used in cosmetic and pharmaceutical art. See 2, lines 1-11.

Teaches that 80 mesh is equivalent to 177 microns. See col. 4, line 53.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the Arraudeau composition by using the carnauba wax powder having particle size greater than 1 micron as motivated by Mizuno and Leis, Jr. because of the expectation to successfully produce the composition with ingredients that are conventionally used and available in cosmetic art. The claimed method of thickening eyelashes is viewed an obvious use of the prior art.

Allowable Subject Matter

Claim 59 is allowed.

Claims 5, 6, 10-17, 23, 30, and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-32 and 59 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Art Unit: 1617

Claim 59 is allowed.

Claims 1-4, 7-9, 18-22, 24-29, and 32 are rejected.

Claims 5, 6, 10-17, 23, 30, and 31 are objected to.
